Office Action Summary

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Andrews.

Andrews teaches a composition comprising a polyoxyethylene derivative tackifier at 1-25% (column 8 lines 17-20) and a cellulosic derivative up to 15% (column 5 lines 37-39). As to the former, polyamers, including pluronic F 68, F 108, and F 127, are specified (column 5 lines 47-68), the same as disclosed by applicants (Table I, page 18). As to the latter, ethyl cellulose is specified (column 7 lines 6-10). These agents are dissolved in an organic solvent. (column 6 lines 49-53). Relative to the combination of the two derivatives<sup>ive</sup>, 25% of the former translates to 62.5 % and 15 % of the latter translates to 37.5%, reading on applicants' claimed ranges.

No claims allowed.
